# Composite engineering using sandwich technology

## Overview

Modular products have gained popularity owing to budget and space constraints. Spacemaker offers pre-fabricated modular building products that are not only versatile in utility but also are aesthetically appealing. Launched in the year 2006 they have fast become popular amongst architects, project managers, builders and contractors.

Spacemaker, a Jyoti Group company brand, has some of the best and experienced technocrats on the board. With Spacemaker it is possible to compose modular structures, size ranging from 1 m width to 5.4 m and covering an area of 1 - 50 sq. m. It has many applications like Security Cabins, Site Office, Site Toilets, Accommodation Units, Camps, Vending Kiosk, ATM Housing, Electrical Housing, Water Filtration Plant Housing, Police Booth and Medical Rooms.

# 10 reasons why spacemaker works

## Advantages

Spacemaker products are a result of composite engineering by using sandwich technology. These building products have several advantages:

- Prefabricated Modular Structures
- Portable & Easy to Install
- Superior Aesthetics
- All weather-proof
- Termite & Rodent proof
- Value for money
- Versatile
- Durable
- Energy Efficient
- Safe

# Applications

### Security Cabins

Concrete structures are bulky and occupy a lot of valuable space in the building compound. Spacemaker security cabins can be easily installed anywhere whatever your space constraints. The aesthetics of these cabins makes the surrounding more appealing.

### Site Office

Building temporary offices in concrete is uneconomical and time consuming. Spacemaker offers site offices with optimum facilities and classy interiors. When the job is done you can just dismantle the structure and use it at any other site.

### Site Toilets

Maintenance of toilets is a big hassle and could lead to hygiene issues. Spacemaker provides toilets of amazing aesthetics and are easy to clean.

### Accommodation Units

High on durability Spacemaker' Accomodation Units are used both as permanent and temporary accomodation purposes. Adhering strictly to building codes these structures are build with precision and are high on quality.

### Vending Kiosk

Fast-food and snacks joints are a fast moving business and moves where the demand is. Spacemaker Vending Kiosks are the quickest solution to set-up your business within days.

### Camps

Spacemaker also provides modular structures for camps as per the requirements.

### ATM Housing

Technology has made it easy for anyone to encash money at any point of the hour irrespective of his location. The ATM culture has spread rapidly with ATM centres sprawling at every corner. Spacemaker housing solutions makes it possible to meet this ever-growing demand in the shortest turn-around time.

### Housing for Water Filtration Plant

Spacemaker Water Filtration Plant Housing are custom made as per the specifications. Keeping in mind the unique demands of water and water treatment applications, these structures are well-engineered to meet the required quality standards.

### Electrical Housing

Spacemaker Electrical Housing structures are the safest and are thoroughly tested for enclosing electrical equipments.

### Police Booth

Security is a big concern these days. Spacemaker Police Booths makes it possible for the police to be more vigilant and keep a check on any crime.

### Medical Rooms

Medical attention requires a clean and a hygienic environment. Spacemaker Medical Rooms provide a perfect setting to diagnose and attend to patient problems even in the most remote areas.
